Vinol is the Only Cure for Stomach Troubles-Her Letter Published for What it is Worth by the Brock & McComas Co.

Mrs. Frank Mann, Vendome Hotel, Seattle, Wash., director of Washington Lyric Association, writes: "After suffering for a long time, and being unable to keep any medicine on my stomach, I was induced to try Vinol I want to say that it is the best medi-cine I have ever seen for dyspepsia and all stomach troubles. It induced a splendid appetite and entirely cured Vinol is certainly an ideal cod ilver oil preparation, for, while the disagreeable taste of cod liver oil is entirely eliminated, it seems to retain all the life-giving elements, it purifies and enriches the blood, tones up the stomach and adds new life and vigor to failing health and strength. I can nend it too highly.

guarantee Vinol is the best remedy for stomach troubles, because where old-fashioned cod live oil, emulsions and sickening drugs upset and derange digestion. Vinol finds a welcome and is readily assimilated by the weakent stomach.

As Vinol contains in a concentrated

form all the healing and strength creating elements of cod liver oil, actually taken from fresh cod's livers, but without oil or grease, it has genuine wital principles that enable it to heal and tone up the irritated, worn, tired

We wish every person in Pendleton suffering with severe stomach trou-bles would try Vinol, on our guarantee to return the money if it falls. Brock & McComas Co., druggists.

WILL REMAIN IN FORCE.

Every Appearance That the Senate Will Aithere to the Policy of Exclusion on Practically the Same Terms That Have Been in Force for Many Years-New Trenty Will Contain the Provisions Restricting Immigration More Closely.

Washington, Dec. 7.- The period of the convention between the United ground grain dry. States and China by which the Chi nese are excluded fro mithis country expires today, but by mutual agree ment its provisions will remain operative until the new treaty arranged by Secretary Hay and the Chinese minister has been presented to the senate and ratified.

From all appearances ment against Chinese exclusion, of which talk is heard now and then, is not sufficiently strong to endanger the fatification of the new treaty by the senate. Should the opponents of the measure start a fight after the treaty is presented to the senate, with any-prospect of success, it is believed that the document would be withdrawn rather than permit its amendment, by the senate in such manner as to weaken the restrictions upon the admission of Chinese of the

The new treaty, it is said, will be equally as strict as the old one in regard to exclusion, but if will contain provisions which will permit the en-trance into the Uunited States of officials, merchants, students and other excepted classes without the restric-

tions new imposed.

A thorough examination will be provided for, through which every Chinaman now in this country and desiring to visit China, with the in-tention of returning to the United States, shall be provided with a certificate entitling hi mto re-enter the United States within two years from the date of departure. The treaty will also contain a provision permitting the United States to establish immigration officials in China, charged with the duty of investigating every United States. With a certificate from such official inspection at the port of entry would be abolished, ex-cept as to the verification of the certificates and identification of appliants for admission

The Standard of Endurance

An Interesting Experiment With Hogs at the Idaho Station. Experiments at the Idaho station to determine the relative value of wet and dry feed show that it required 422 pounds of grain to produce 100 pounds of gain in live weight in the case of the dry feed lot and 485

ounds of grain to produce 190 ounds of gain in Lot 1 fed on soaked. griesing. This shows a difference in favor of the dry feed. In a majority of the experiment

there is a small margin in favor of sonking grain for pigs and it is espe-cially marked when whose grain is There is only a small per cent. in favor of souked grain when ground. The foregoing experiments seem to in-
